

Project Overview: RihlatBladna

1. Short Description

RihlatBladna is a 'Social Marketplace' dedicated to authentic Moroccan tourism. It bridges the gap between digital convenience and human trust by allowing local travel agencies to list tours and build community followings, while enabling travelers to discover hidden gems and contact agencies directly via WhatsApp.

2. Main Goals

- Digitize local Moroccan agencies that currently rely only on physical offices.
- Centralize authentic Moroccan travel offers in one trustworthy platform.
- Build Trust through a 'Verification Badge' system and community social proof.

3. Target Audience

- Primary: Domestic Travelers (Moroccans exploring their own country).
- Secondary: International Tourists looking for authentic experiences.
- Partners: Small to Medium Travel Agencies (SMEs) in Morocco.

4. What the Platform Offers

- A centralized search engine for tours, hikes, and local trips.
- A social feed for agencies to post updates and engage with followers.
- A direct 'Lead Generation' link to WhatsApp for booking.
- Verification status for agencies to ensure safety.

5. What the Platform Does Not Do

- No Payment Processing: We do not handle money transactions.
- No Liability: We are not responsible for the trip quality; we are the connector.

6. Geographic Focus

- Now: Northern Morocco (Tangier, Tetouan, Chefchaouen) & Merzouga.
- Later: Full National Coverage (Agadir, Dakhla) and International.

7. Success Definition

- Short Term: Onboard 50 Verified Agencies and reach 500 Daily Active Users.
- Long Term: Becoming the #1 alternative to Booking.com for Moroccan excursions.
